HCC, inc.

# PADDLE

- Increased Harvest Yields
- Improved Feeding
- Cleaner Cutterbar
- Faster Harvesting

## High Performance Tines for Short or Sparse Crops

The Paddle is a proven tine replacement system that offers true high performance at harvest time. When crop conditions make harvesting difficult and inefficient, The Paddle is the cost-effective alternative to standard tines.

*The Paddle is designed to provide a complete sweep of the header with each rotation. By limiting the number of Paddles used, you save installation time and money.*

### Maximized Pickup

The Paddle's six-inch width lifts and feeds crop that standard tines miss. The Paddle provides full crop contact, even with short crop, and delivers positive and even feeding into the header. The Paddle helps reduce or eliminate the need for an expensive air reel.

The Paddle is available for wood bat, tear-drop, and tube-type reels. HCC's patented tine mounting system makes installation fast and easy. Paddles are packaged ten to a box and include mounting hardware with complete installation instructions.

*Paddle shown is for tube-type reels.*

# Improving Combine Performance From Start to Finish

HCC, inc.

Original Tine Spacing	Reel Width				
	18'	20'	25'	30'	36'
	Recommended Number of Paddles				
4.5"	40	40	50	60	n/a
6.0"	30	40	40	50	60

*Individual preferences or conditions may call for increasing the number of Paddles or altering the installation pattern.*

## Proven Performance

In a survey of Paddle customers, the Paddle was proven to provide true high performance at harvest time, even in difficult crop conditions:

- 84% said the Paddle reduced crop loss
- 94% said the Paddle improved feeding
- 87% said the Paddle met or exceeded their expectations
- 94% said installation was fast and easy
- 90% said the Paddles were very durable
- 90% said they would recommend the Paddle to others
